# 3-003.01 GILROY-HOLLISTER VALLEY - LLAGAS AREA

#### **Basin Boundaries**

#### Summary

The Llagas groundwater subbasin is a portion of the Gilroy-Hollister Valley groundwater basin located in the Santa Clara Valley of California. The northern boundary of the subbasin extends from the groundwater divide at Chochran Road north of the town of Morgan Hill which is identified as the IRWM Pajaro River Watershed. The eastern boundary is the Diablo Range. The southern boundary is the Santa Clara and San Benito County line. The eastern boundary is the Santa Cruz Mountains. The basin boundary is defined by the (6) segments detailed in the descriptions below.

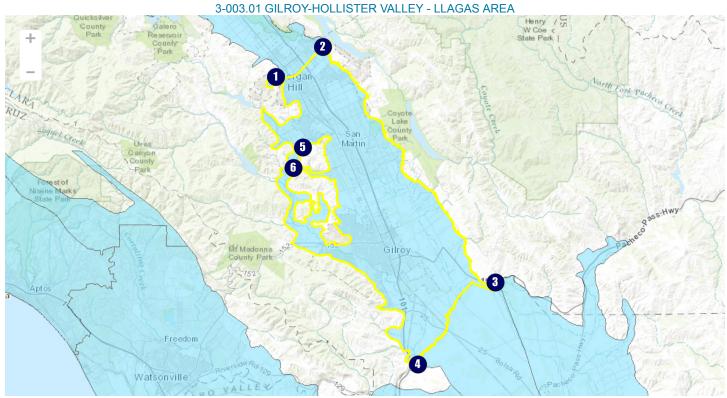

### Segment Descriptions

Segment Label	Segment Type	<u>Description</u>	Ref
1-2	Management Area Begins from point (1) and follows the IRWM Pajaro River Watershed to point (2).		{a}
2-3	<sup>E</sup> Alluvial	Alluvial Continues from point (2) and follows the contact of alluvium with rocks of the Diablo Range to point (3	
3-4	<sup>I</sup> County	Continues from point (3) and follows the Santa Clara/San Benito County line to point (4).	{c}
4-1	<sup>E</sup> Alluvial	Continues from point (4) and generally follows the contact of alluvium with rocks of the Santa Cruz Mountains to the end at point (1).	
5-5	l Alluvial	Continues from point (5) and follows the contact of alluvium with marine sedimentary rocks and returns to point (5).	{b}
6-6	l Alluvial	Continues from point (6) and follows the contact of alluvium with marine sedimentary rocks and returns to point (6).	{b}
